SolarMAX LED Lighting installation

To Whom It May Concern:

In January of 2014, SolarMax LED successfully installed LED lighting for our entire interior and exterior building where we establish and print our Chinese newspaper. (We are one of the largest Chinese newspaper company in Southern California).

The installation involved retrofitting all of our light bulbs to LED. Interior LED lighting was replaced in our offices, lobby, conference rooms and hallways which created a better working atmosphere. The exterior parking LED lighting was able to create a brighter, safer and secure environment.

The process from the beginning to the final installation has been completely pleasant. Their team came and did an audit of the building and shortly after, created a proposal. From the proposal, we saw that we were able to save 12% on our monthly bills. The amazing part about SolarMax LED is that they were able to provide us with a financing option; therefore, we didn't have to pay an upfront cost for all of the lights. Once the contract was signed, their team came and installed all the lighting in an efficient and timely matter. The best thing about their team was not only did they have good work ethic, but they continuously had a positive attitude throughout the entire process.

I would definitely recommend SolarMax LED to any commercial owners who are looking to save money on their electricity bills and looking for a competent group of people to do the job.

Respectfully,
